

S.No: 30	Exp. Name: <i>Write a program to double a given number and add two numbers using lambda()</i>	Date:2023-09-20
----------	---	-----------------

Aim:

Write a program to double a given number and add two numbers using lambda()

Source Code:

lamda.py

```
num1=int(input("Enter a Number : "))
num2=lambda num1 : 2*num1
print("After Doubling Num1 and assigning to Num2  = ",num2(num1))
print("Num 1 + Num 2 = ",num1+num2(num1))
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Enter a Number : 10
After Doubling Num1 and assigning to Num2 = 20
Num 1 + Num 2 = 30
