

Aim:

Write a python program that prints list element and its length

Source Code:

```
listLength.py
```

```
n=input("Enter comma separated list elements: ")
ls=n.split(",")
for i in ls:
    print(i,len(i))
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Enter comma separated list elements: cow,elephant,tiger,fish
cow 3
elephant 8
tiger 5
fish 4

Test Case - 2
User Output
Enter comma separated list elements: apple,banana,chikoo,dragonfruit,grapes
apple 5
banana 6
chikoo 6
dragonfruit 11
grapes 6
