Aim:

Write a python program to print a list of numbers using range and for loop

Source Code:

DisplayListFor.py

```python
list=list(input("Enter Elements of list Separated By Commas : ").split(','))
print("Elements of List : ")
for i in list:
    print(i)
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Enter Elements of list Separated By Commas : 1,2,3,4,5
Elements of List :
1
2
3
4
5
